EDUCATION

Bachelor of Engineering Program in Computer Engineering and Digital Technology
Chulalongkorn University - Bangkok, Thailand
Current GPAX: 3.95

TECHNICAL SKILLS

- Frontend: TypeScript, React, Next.js, Redux, TailwindCSS, Shadcn UI
 - Backend: Go (Testify), Node.js (Express, Nest.js), Java (Spring Boot)
 - Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB
 - Cloud & Infrastructure: AWS, Terraform, Docker, Kubernetes
 - CI/CD & Testing: GitHub Actions, GitLab CI/CD, Playwright
-

PROFESSIONAL EXPERIENCE

Technical Lead | Chula ESC | August 2026 – Present

Architected and led the development of core campus digital platforms, managing a team of developers to deliver scalable software solutions.

- Established engineering best practices, including code reviews, comprehensive testing workflows, and automated CI/CD pipelines.
- Helped developers in frontend and backend technologies.

Full-Stack Freelancer | MEE PALANG MAI CO., LTD. | June 2026 – Present

Developing Curious, a live audience engagement platform inspired by Kahoot and Mentimeter for Chulalongkorn University. Built full-stack features using Next.js, Go, MongoDB, and AWS-based services while collaborating with stakeholders to deliver real-time quizzes, polls, and Q&A; functionality.

Fullstack Engineer Intern | OxygenAI Co., Ltd. / OMNI DEAL CO., LTD. | May 2026 – July 2026

- Developed and maintained end-to-end web applications, leveraging Angular for the frontend and Go for the backend architecture.
- Integrated secure RESTful APIs using Go and optimized client-side state management and component performance in Angular, significantly improving page responsiveness.
- Collaborated with cross-functional teams in an Agile environment to rapidly scope, build, and deploy high-impact features.

Backend Developer Intern | Apppi co. ltd | May 2025 – June 2025

- Engineered RESTful APIs in Go, adhering strictly to Clean Architecture principles (Handler, Service, Repository layers).
 - Authored unit tests utilizing Go testing and Testify, significantly increasing code coverage and system reliability.
 - Integrated LINE Login OAuth for secure, streamlined user authentication.
 - Enforced rigid security measures, including input sanitization and validation protocols to prevent injection attacks.
 - Utilized GitLab for version control, actively driving regular code reviews and participating in fast-paced Agile sprints.
-

PROJECTS

1. Curious. A live audience engagement platform for Chulalongkorn University inspired by Kahoot and Mentimeter, enabling students to participate in real-time quizzes, polls, and interactive Q&A sessions. My Role - Implement the content management for each Activity, Slide. And implement token-based authentication.

2. PokeBattleP2P : <https://github.com/MadManJJ/PokeBattleP2P>. A peer-to-peer multiplayer game using Java sockets to enable real-time gameplay between players

My Role - Implemented the logic behind the fighting between two players and sending data from each player via a socket using Java and Java socket.

3. Vishnu 23rd and Intania First Date 2025 : <https://github.com/vishnu-23rd/vishnu-23-website>. A website for first-year students to participate in activity to get to know each other.

My Role - Designed and implemented the database and API for the Bingo page using Firebase, Next.js.
